

.....

Flexible Seating in the Room!

Our classroom now has stability balls, wobble seats, and different height tables. The purpose of flexible seating is to help students be most successful by letting them have some freedom of seating and movement.

November 30, 2016

Language Arts- We are working on writing a letter. Students will be mailing these letters to someone of their choice. Please return the address form as soon as possible!

Math- We started our unit on shapes and measurement. Right now we are working with centimeters. Make sure your child is bringing back their homework each day!

Religion- We have started our first week of Advent. Every day in December, we will be talking about a different act of kindness.

*We will be doing a gift exchange for Christmas. Each student will draw a name and be asked to purchase a gift in the \$10 range for the person that they draw. If you choose to not have your child take part, please let me know. We will be drawing names next week.

.....

Upcoming Dates:
